

On December 8, 2018 I tripped over an electronic equipment cable and fell down. Thank God, I had no fractures, but I scraped part of the skin of my elbow and knee. Despite the care I had, some bacteria penetrated both parts of my body under the skin and I got cellulitis. I bought in **Shopfreemart** "Pure Silver Concentrate". I received it by Mail on December 17th and started using it that same evening. During the first two days I put a few drops under my tongue twice daily, and also over the affected areas. The last three days, I just placed a few drops topically over the affected areas. Observe in the photos the healing progress in just 5 days.
